

After the Fire Safety

Identify any safety concerns you have with these photos.

- After fire extinguishment, always evaluate the many hazards associated with the fire scene.
- Review SOG for overhaul and salvage operations
- Discuss what you would do in a similar fire in your district

Consider:

- Air quality monitoring
 - Structural stability
 - Lighting
- Fatigue of members
- Airborne contamination
- Cause & origin preservation

Potential Hazards:

- Fire weakened structure
- Toxic gases
- Additional fire extension
- Airborne debris
- Damage to structure while doing overhaul
- Holes in floors or ceilings
